AIRCRAFT EXTERIOR CLEANING PRODUCTS

AERO WASH N WAX

Davies "Aero Wash N Wax" is a chemical breakthrough in liquid aircraft wash technology. It makes it possible to thoroughly wash and wax your plane in one operation! "Aero Wash N Wax" first scrubs the vehicle clean, and then leaves a protective wax coating. This amazing chemical discovery simply hoses to a bright luster, no chamoising is required, just apply with a sponge or soft brush, and hose it off. "Aero Wash N Wax" is recommended for all types of finishes. It rinses easily and quickly, and is the perfect time saver.

AERO-PREP #500

"Aero-Prep #500" has some rather remarkable characteristics - it is unexcelled for safely and quickly removing exhaust stains as well as emulsifying and removing heavy grease and soil deposits before shampooing. It is a synergistic product that has many different applications such as removing exhaust stains and grease and oils from the underside of the aircraft. Being a concentrate, the versatility of "Aero-Prep #500" makes it a very economical product. It may even be used in dilute form for washing the entire aircraft. "AERO-PREP #500" is biodegradable, nonflammable and nontoxic. It will rinse free of film and residues.

DIRECTIONS:

- Removing exhaust stains - 1 part "Aero-Prep" to 5 parts water
- Engine & small parts cleaner - 1 part "Aero-Prep" to 3 parts water
- Cleaning concrete floors - 1 part "Aero-Prep" to 5 parts water
- General all-purpose cleaning - 1 part "Aero-Prep" to 3 parts water
- Cleaning vinyl - 1 part "Aero-Prep" to 40 parts water

"Aero-Prep #500 must be rinsed immediately after using. DO NOT allow "Aero-Prep #500" to dry on any surface!!

AERO-KLEEN #400

The only aircraft detergent with - - POSITIVE EMULSION- - an emulsion so strong, oil will not redeposit (will not settle out on the surface before the job is finished) thus leaving a dull finish after washing. Cuts through exterior grime without dulling the finish. Safe, at any dilution. Formulated for quick, easy and effective application with all kinds of automatic washing apparatus, portable spray units, etc. Recommended by the Aviation Consumer, an independent report to pilots and aircraft owners. Tested and Approved to meet specifications of McDonald-Douglas CSD #1 Type 1, U.S.A.F. MIL-C-25769J, Boeing and Aerospace Material AMS.

SPEED WAX

Davies "Speed-Wax" is ideal for the professional aircraft maintenance person or co-pilot who are short on time. As the name states, this product goes on and comes off at close to mach speed, leaving a showroom finish. "Speed-Wax" simply wipes on and off, no oscillating applicator or water is needed. It is perfect for those "on the road" applications when a quick shine is needed to remove rain or dew water spots. "Speed-Wax" will remove pollution or exhaust stains, is safe on emron and aluma-grip paints, and will not harm glass or plastic. The thin polish left behind not only keeps your aircraft looking new, but also protects the paint. DuPont "Teflon" is added for enhanced durability during all weather and flying conditions.

AERO-TECH WIPES

Davies "AERO-TECH WIPES" blends the micro-fiber cloth technology, with the special needs of the aircraft cleaning industry. Select synthetic materials are micro-processed, into durable fibers, re-combined into a strong, durable, non-scratch fabric. This specialty process supplies "AERO-TECH WIPES" with the non-scratch features, provides outstanding dirt lifting and entrapment properties and also the wet or dry use options. "AERO-TECH WIPES" are made in the handy 16" by 16" size, and are available in individually poly-packs, or bulk packaged in 10 and 50 quantities. It is recommended that 2 "wipes" be used per aircraft, one for the interior and one for the exterior. One also comes in real handy in the cockpit to wipe off the instrument panel gages and screens.
